

Use Case: Add Employee

Actor: Admin

Preconditions:

- User must be logged in.
- There should be access to PIM module.

Main Flow (Basic Flow/ Main Success Scenario)

1. User navigates to PIM module. ->(System opens module)
2. User clicks to “Add Employee” option. ->(System opens Add Employee page.)
3. User enters First Name and Last Name
4. User enters Employee ID (or leaves it default)
5. User clicks save button.
6. System saves the employee data to database.
7. System Successfully adds the new employee.

Alternate Flow:

A1: User doesn't enter the Middle Name.

- System accepts and the use case continues.

A2: User adds photo.

- System checks if the photo is meets the expected conditions.
- System approves and saves it if it meets tge conditions.

A3: Login details are chosen by user.

- User enters username.
- Status chosen by user.
- User enters password.
- User enters password again to confirm password.

- System saves and creates login details.

Exception Flow:

E1: First Name is empty

- System shows an error message.
- User enters valid First Name this time.
- Use case resumes from where the error occurred.

E2: Last Name is empty

- System shows an error message.
- User enters valid Last Name this time.
- Use case resumes from where the error occurred.

E3: Employee ID is duplicate

- System shows an error message.
- User enters valid (not chosen by someone else) Employee ID this time
- Use case resumes from where the error occurred

E4: User enters not a strong password (A3's exception flow)

- System shows an error message.
- User enters valid (provides the criteria: For a strong password, please use a hard to guess combination of text with upper and lower case characters, symbols and numbers,) password this time.
- Use case resumes from where the error occurred.

E5: User adds a photo which doesn't meet the conditions. (A2's exception flow)

- System shows an error message.
- User adds valid (provides the criteria; Accepts jpg, .png, .gif up to 1MB. Recommended dimensions: 200px X 200px.) photo this time.
- Use case resumes from where the error occurred.

Post Conditions:

- System successfully adds the Employee to the system
- Employee can be seen in the employee list.
