

Usability Evaluation Report

SUT1: OrangeHRM Open Source Edition

Scope of SUT1:

This report evaluates the usability of the OrangeHRM system using heuristic evaluation based on Nielsen's 10 usability principles. The analysis focuses on how user-friendly the system is, particularly in terms of navigation flow, interface design, and error handling.

The evaluation covers key modules of the system, including the PIM module (Add Employee functionality) and the Leave module (Assign Leave and management processes). It also examines user interaction, system feedback, and error messages to assess the overall user experience and identify areas for improvement.

Prepared By: Şevval Demir

Project: Usability Testing

Status: Final Version(The usability evaluation has been completed and documented.)

1- ***Visibility of System Status***

The system provides feedback when searching records, which helps users understand the system status clearly:

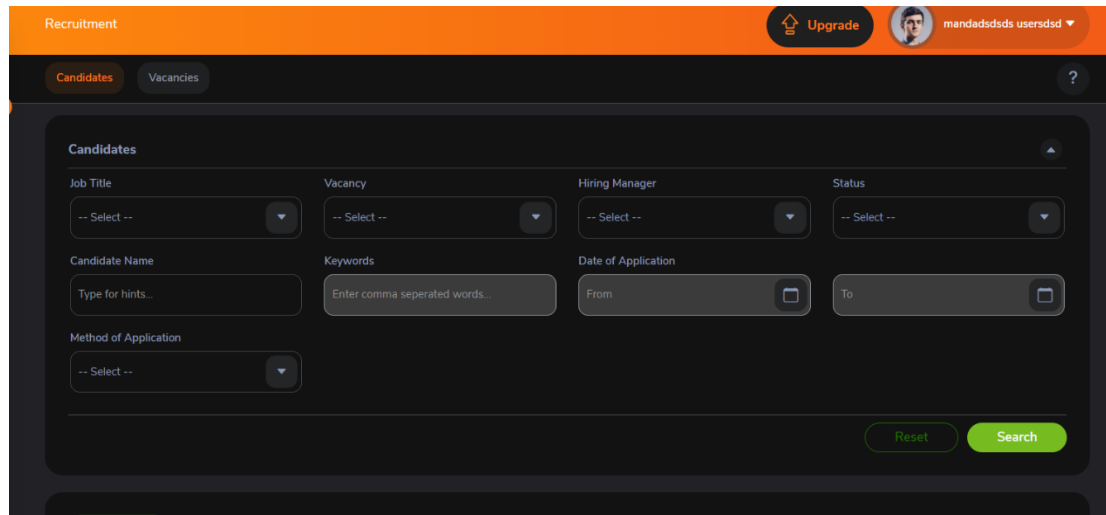

The screenshot shows the OrangeHRM PIM (Personnel Information Management) interface. The left sidebar contains navigation links: Admin, PIM (selected), Leave, Time, Recruitment, My Info, Performance, Dashboard, Directory, Maintenance, Claim, and Buzz. The top navigation bar includes 'Configuration', 'Employee List' (selected), 'Add Employee', and 'Reports'. The main content area is titled 'Employee Information' and contains search filters: Employee Name (Ranga Akunuri), Employee Id (0277), Employment Status (-- Select --), and Include (Current Employees Only). Below these are Supervisor Name (Type for hints...), Job Title (-- Select --), and Sub Unit (-- Select --). A 'Reset' button and a 'Search' button are at the bottom right of the filter section. A '+ Add' button is located below the filter section. The search results section shows '(1) Record Found' and a table with the following data:

☐	Id	First (& Middle) Name	Last Name	Job Title	Employment Status	Sub Unit	Supervisor	Actions
☐	0277	Ranga	Akunuri					 

The screenshot shows the OrangeHRM PIM (Personnel Information Management) interface with the same search filters as the previous screenshot. However, the search results section now shows 'No Records Found'. A blue notification banner at the bottom left displays an information icon, the text 'Info No Records Found', and a close button. The footer of the page contains the text: 'OrangeHRM OS 5.8 © 2005 - 2025 OrangeHRM Inc. All rights reserved.'

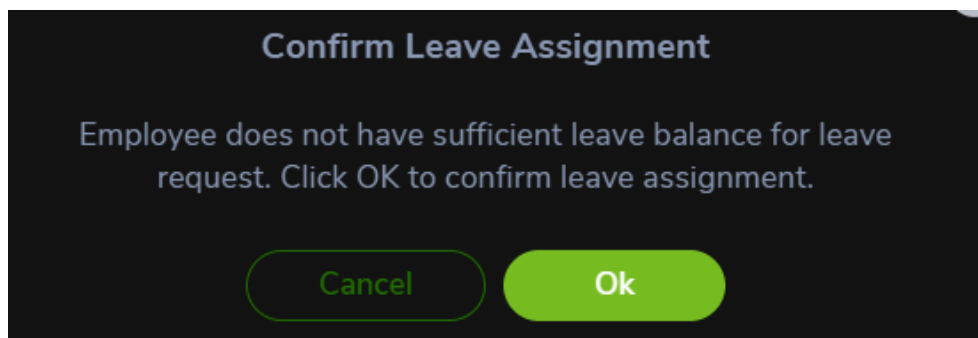

2- Match Between the System and the Real World

The system uses real world words such as below, that makes it easy for users to understand the interface.

The screenshot shows a web application for recruitment. At the top, there's an orange header with the word "Recruitment" on the left, an "Upgrade" button with a house icon in the center, and a user profile icon with the name "mandadsdsds usersdsd" on the right. Below the header, there are two tabs: "Candidates" (active) and "Vacancies". The main content area is titled "Candidates" and contains a search form. The form has several fields: "Job Title" with a dropdown menu showing "-- Select --", "Vacancy" with a dropdown menu showing "-- Select --", "Hiring Manager" with a dropdown menu showing "-- Select --", and "Status" with a dropdown menu showing "-- Select --". Below these, there's a "Candidate Name" field with a placeholder "Type for hints...", a "Keywords" field with a placeholder "Enter comma seperated words...", and a "Date of Application" field with "From" and "To" sub-fields, each with a calendar icon. At the bottom of the form, there's a "Method of Application" dropdown menu showing "-- Select --". To the right of the form, there are two buttons: "Reset" and "Search".

3- User Control and Freedom

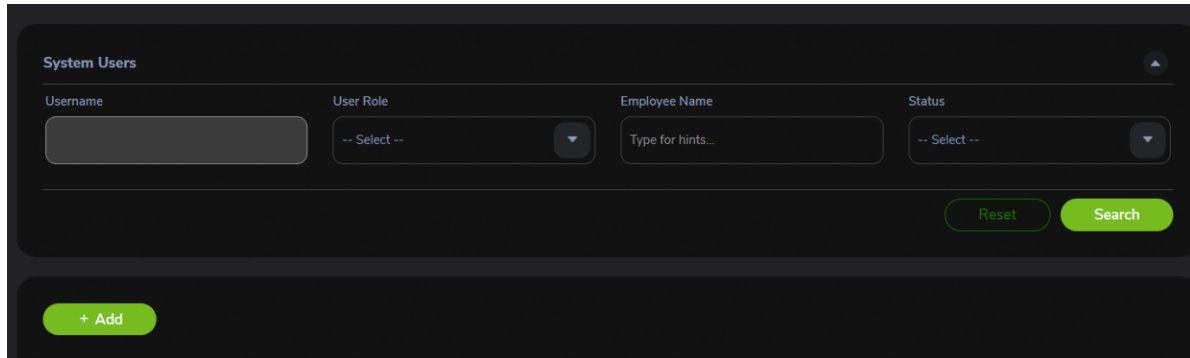

System informs the user when an operation is not confirmed.

The message is detailed enough. The system also allows users to Cancel operations, which it is proper for Nielsen's Usability Heuristic and gives users control and freedom.

4- Consistency and Standards

The system has consistent buttons and interface elements which provides improved usability.

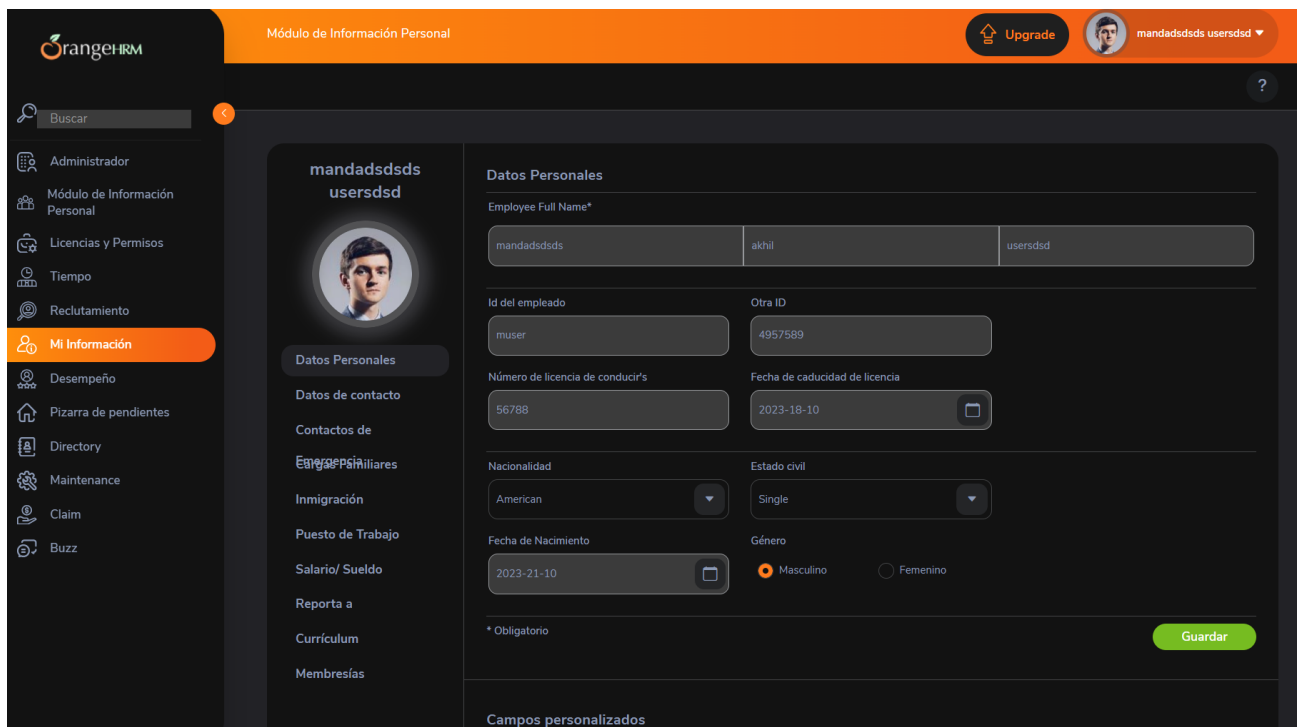

That provides better usability for user.

The screenshot shows a 'System Users' form with a dark background. At the top, there's a title 'System Users' with a small upward arrow. Below it, there are four input fields: 'Username' (a text box), 'User Role' (a dropdown menu showing '-- Select --'), 'Employee Name' (a text box with placeholder 'Type for hints...'), and 'Status' (a dropdown menu showing '-- Select --'). To the right of these fields are two green buttons: 'Reset' and 'Search'. At the bottom left, there is a green button with a plus sign and the text '+ Add'.

But also,

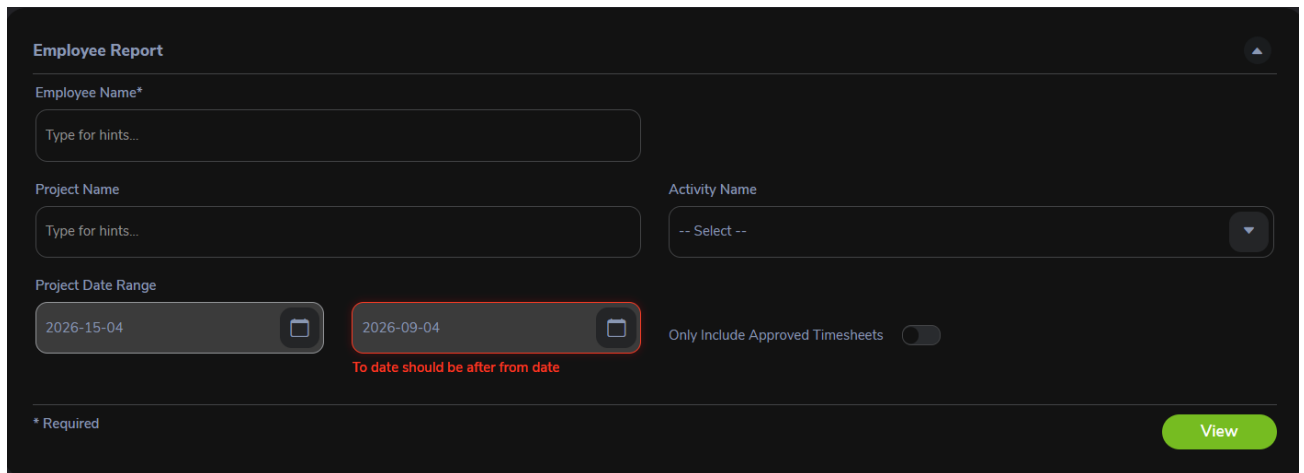

System turns into a different language which is setted up as a English before, That problem affects negatively the user's usability.

The screenshot shows the 'Módulo de Información Personal' (Personal Information Module) in the OrangeHRM system. The interface has a dark theme with orange accents. At the top, there's a header bar with the OrangeHRM logo, the module name 'Módulo de Información Personal', an 'Upgrade' button, and a user profile dropdown showing 'mandadsdsds usersdsd'. On the left, there's a sidebar with various navigation options: 'Administrador', 'Módulo de Información Personal', 'Licencias y Permisos', 'Tiempo', 'Reclutamiento', 'Mi Información' (highlighted in orange), 'Desempeño', 'Pizarra de pendientes', 'Directory', 'Maintenance', 'Claim', and 'Buzz'. The main content area is divided into two sections. On the left, there's a profile card for 'mandadsdsds usersdsd' with a circular profile picture and a list of tabs: 'Datos Personales' (selected), 'Datos de contacto', 'Contactos de', 'Enlaces Personales', 'Inmigración', 'Puesto de Trabajo', 'Salario/ Sueldo', 'Reporta a', 'Currículum', and 'Membresías'. On the right, the 'Datos Personales' form is displayed. It includes fields for 'Employee Full Name*' (split into three boxes: 'mandadsdsds', 'akhil', 'usersdsd'), 'Id del empleado' (muser), 'Otra ID' (4957589), 'Número de licencia de conducir's' (56788), 'Fecha de caducidad de licencia' (2023-18-10), 'Nacionalidad' (American), 'Estado civil' (Single), 'Fecha de Nacimiento' (2023-21-10), and 'Género' (Masculino selected, Femenino unselected). There's a green 'Guardar' (Save) button at the bottom right. A section for 'Campos personalizados' (Custom Fields) is visible at the very bottom.

5- Error Prevention

The system provides logical warnings to help users avoid mistakes, which supports error prevention.

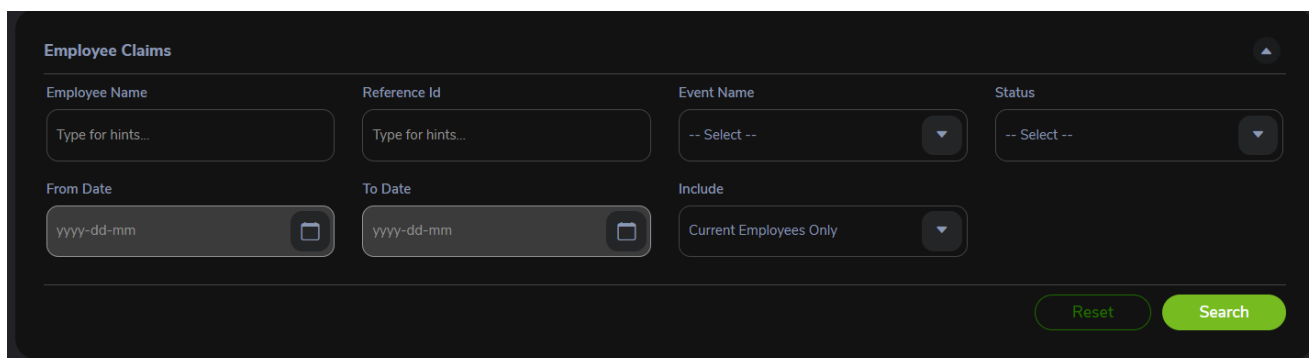

The screenshot shows a form titled "Employee Report". It contains several input fields: "Employee Name*" (with a placeholder "Type for hints..."), "Project Name" (with a placeholder "Type for hints..."), "Activity Name" (a dropdown menu showing "-- Select --"), and "Project Date Range" (two date pickers). The first date picker is set to "2026-15-04" and the second to "2026-09-04". A red border highlights the second date picker, and a red warning message "To date should be after from date" is displayed below it. To the right of the date pickers is a toggle switch labeled "Only Include Approved Timesheets". At the bottom left, there is a note "* Required". At the bottom right, there is a green "View" button.

The warning is clear and leads user to write the correct answer.

6- Recognition Rather than Recall

The system provides date pickers, placeholders and dropdown menus to help users to recognize options instead of remembering them. This reduces user effort and also improves usability.

The screenshot shows a form titled "Employee Claims". It contains several input fields: "Employee Name" (with a placeholder "Type for hints..."), "Reference Id" (with a placeholder "Type for hints..."), "Event Name" (a dropdown menu showing "-- Select --"), "Status" (a dropdown menu showing "-- Select --"), "From Date" (a date picker showing "yyyy-dd-mm"), "To Date" (a date picker showing "yyyy-dd-mm"), and "Include" (a dropdown menu showing "Current Employees Only"). At the bottom right, there are two buttons: a green "Reset" button and a green "Search" button.

7-Flexibility and Efficiency of Use

The system provides filtering and search options to help user to perform tasks more efficiently. However it doesn't offer advanced features such as shortcuts or autofills. That could improve efficiency for experienced users.

Id	First (& Middle) Name	Last Name	Job Title	Employment Status	Sub Unit	Supervisor	Actions
dfgqjgh	123445 34	444444					[Edit] [Delete]
0295	99N75 425	5TIV					[Edit] [Delete]

8- Aesthetic and Minimalist Design

The system has a clean and modern design, However some pages contain many input fields and that makes interface slightly crowded and affects readability. A more minimalist design could improve user's experience.

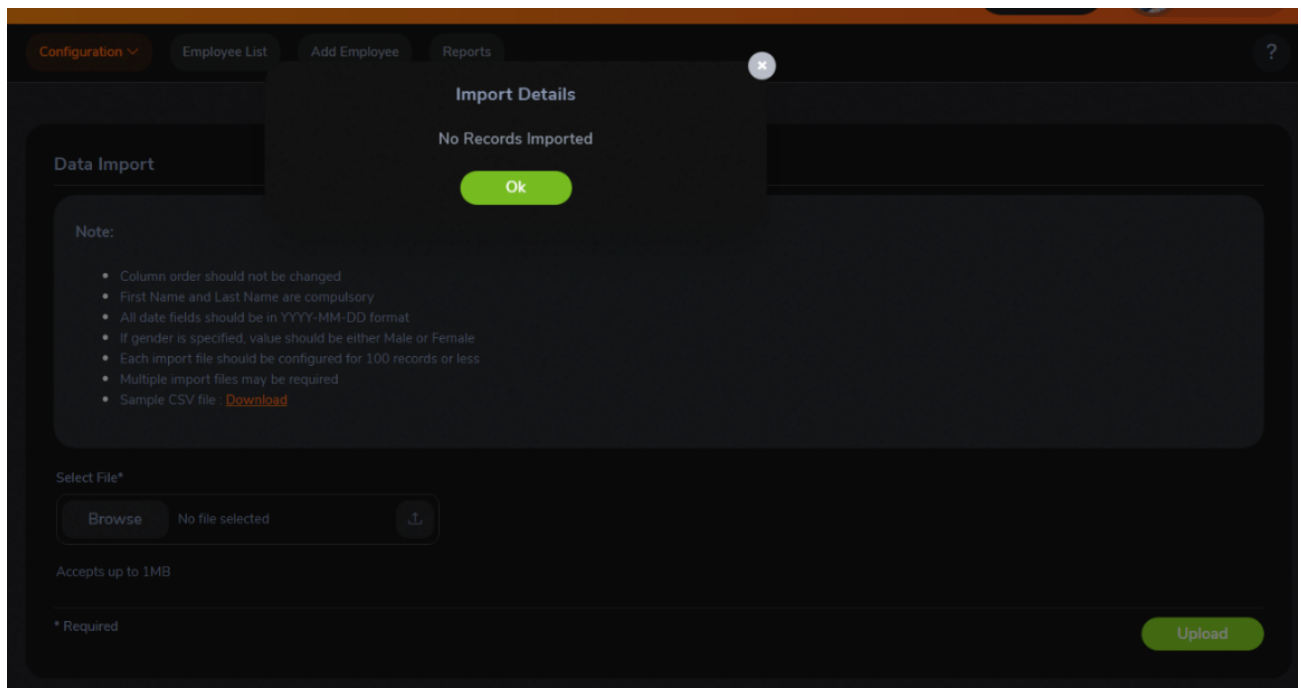

Vacancy	Candidate	Hiring Manager	Date of Application	Status	Actions
	Tanmay Anderson O'Keefe	(Deleted)	2024-29-03		[View] [Delete]
	Tanmay sree Dachu	(Deleted)	2024-06-02		[View] [Delete] [Download]

9- Help Users Recognize, Diagnose, and Recover from Errors

In the PIM page, if there is a employee which is not match with records, System displays an error message. However these messages are not detailed enough for users to fully understand the problem.

In the PIM's configuration page, file upload functionality doesn't work properly. Given sample file uploaded to OrangeHRM, It doesn't work and system shows an error and the operation is unsuccessful, That situation negatively affects usability.

In Leave page Assign part works correctly and It shows error messages in correct places.
This helps user to identify and correct mistakes more easily.

Assign Leave

10- Help and Documentation

The system has a customer support service which helps user to contact for any issues and to share experiences.

Getting Started with OrangeHRM

Learning how to use a new application can be challenging. At OrangeHRM, we are committed to providing you with the necessary knowledge and skills required to fully utilize the application thereby allowing you to quickly and efficiently manage your HR processes.

The following information repositories are available to help you understand the application:

 **Customer Support**
Should you experience any issues, please do not hesitate to contact us on ossupport@orangehrm.com We will be delighted to help.

- **Navigation Flow of Add Employee**

1. User logs into the system
2. User navigates to the PIM module
3. User clicks on “Add Employee”
4. User enters employee details
5. User clicks the save button
6. System validates the input
7. System adds the employee and displays confirmation.

- **Navigation Flow of Leave Assignment**

1. User logs into the system
2. User navigates to the Leave module
3. User selects “Assign Leave”
4. User enters employee name
5. User selects leave type
6. User selects dates
7. User clicks Assign
8. System validates input
9. System confirms leave assignment.

- Overall Usability Rating: 85% (Good usability with minor issues).

The system demonstrates good usability, but there are some minor issues that could be improved to enhance the user experience.
